What is Evidence Based Acquisition?

Evidence Based Acquisition (EBA) allows libraries to offer a collection of ebooks for a fixed period and then make final purchasing decisions after evaluating usage data.

How does EBA work?

STEP 1

We will work with you to establish pricing and a range of titles. Once you've made your deposit, your EBA access period begins.

STEP 2

Enjoy access to all the agreed upon titles within OSO for 12 months. During this time, OUP will provide regular usage reports.

STEP 3

At the end of the 12 month period, you decide which titles you will purchase. These titles then form part of your permanent collection.

What does EBA mean for my library?

EBA means you can take the risk out of purchasing OSO titles for your library, because our usage reports will tell you which titles are the most used. You can then purchase titles in the knowledge that your budget is being well spent. As an added benefit, your patrons will have the use of a wide range of content during the 12 month access period.

Why might EBA be a good fit for my library?

EBA is a useful model for libraries which previously have not had access to OSO, as well as those looking for ways to maximize discoverability and access to high quality scholarship.
