

Understand and report more of your researchers' outputs

The average researcher spends upward of 50 hours reviewing each year. That's more than a week. For an institution with 500 active researchers that means upwards of 3,125 working days of critical research contributions going unreported, concealing both the researchers', and the institution's, true output and impact.

Publons allows researchers to effortlessly build a complete and independently verified record of their peer review and editorial contributions, providing evidence of these previously hidden research contributions.

REVIEWER PROFILES

We support institution-wide uptake, ensuring you get the full picture of your faculty's reviewing and editorial output.

PUBLONS API

Link our API to CRIS or profile systems to get a direct feed of your researchers' review and editorial activity.

REVIEW TRAINING

Great reviewers make great researchers. We train your faculty how to master peer review and help them connect with top journal editors.

PARTNER DASHBOARD

Real-time insight into your faculty's reviewing and editorial output. Easy access to customized, contextualized, and verified evidence and reports to strengthen researcher assessments.

New evidence of researcher contributions and standing

Today, funding organizations are looking for new indicators, beyond publication data, to identify the experts who will deliver the impactful breakthroughs of tomorrow.

With funding budgets reducing, it is critical for institutions to clearly and quickly demonstrate every aspect of their researchers' expertise, output and impact.

Publons helps institutions understand and report on all the scholarly peer review and editorial contributions their researchers are already performing, revealing new evidence of researchers' standing, service, and impact in their field.

What is Publons

Publons provides universities with ready-to-report data about how much peer review and editorial work their researchers are already doing, as well as the breadth and quality of the journals they are reviewing and editing for.

Universities can now easily demonstrate a comprehensive, 360-degree view of their researchers' contributions — helping strengthen funding applications in today's highly competitive environment — without leaving valuable information unaccounted for.

As Professor Amanda Salis states, *"It is no longer enough to just be doing great research; you also need to demonstrate that you are contributing to your profession more broadly."*

Publons also provides the world's pre-eminent peer review training course — The Publons Academy — to equip early career researchers with the skills and connections they need to become masters of peer review, and to impress journal editors.

Partners can offer an all access, custom-branded version of the Publons Academy to their faculty, reducing the teaching and administrative burden for senior staff.

“

This partnership provides an incentive for our academics to engage in more reviews and improve their reviewing skills. That itself is a powerful feedback mechanism through which they can learn from and apply when developing their own research ideas.

Professor Kate McGrath
Victoria University's Vice-Provost (Research)

“

We are a world-leading business school, and the leading business school in the Asia Pacific. We want to take every opportunity for this to be publicly visible. Publons is one of those many new opportunities.

Sara Dolnicar
Research Dean of the UQ Business School
