

Save hours and fly through your next research paper

The volume of published research is growing

Over three million peer reviewed papers were published in 2018 alone, and annual growth has accelerated to 4% in recent years ([STM Report 2018](#)).

Peer reviewed papers were published in 2018 alone.

Being a scholar isn't a 9–5 job

Behind this trend is a long-hours culture in academia. Researchers both new and experienced face a steady pressure to contribute to scientific development—and weekends are no exception ([Times Higher Education Survey, 2018](#)).

Nature Survey, 2018

Citations are rising

Sourcing, organizing and formatting citations is tedious work, but crucial to publishing robust research. With this in mind, the number of citations is on the rise: 47 citations per paper were used on average in 2019—up from 35 citations in 2009.

It now takes longer

The accelerated growth in publications and cited references means the mundane task of adding citations now takes longer: each year, across the globe, researchers are spending 195,703+ hours formatting citations.*

*Based on 3-million publications and 5-seconds per citation.

Your paper was rejected. What next?

The rejection rate for manuscripts submitted to scholarly journals each year is 45%. To submit research to another journal, scholars need to reformat their entire papers and bibliographies for different style guides ([Publons Global State of Peer Review Report](#)).

”

"We reject something on the order of 90%+, and that's the same for *Nature*, *Cell*, and *Science*."

Plos Biology Journal Editor

That's 195K hours of wasted work. Unless you have *EndNote*.

EndNote

EndNote gets you organized, saves you time, and helps you fly through your next research project.

- Import references
- Share reference libraries
- Cite while you write
- Reformat citation styles

Research. Smarter.

Buy EndNote today or try it free for 30 days. Visit endnote.com to find out more.
