- ● *Space and Place are still very important as part of libraries, as well as the competencies of library staff. It's the combination of digital and physical libraries that are the future*

LIBER

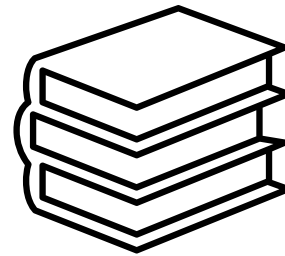

Creating space in the library – the use and value of digital content

"Increasingly students want a greater variety of spaces including quiet spaces to study individually (or alongside others), flexible spaces for group work, and well-resourced spaces where they can connect to multiple learning resources. The library can supply all these types of space, in a way that other campus buildings rarely do." Andrew Cox, University of Sheffield

How are open access agreements supporting researchers in making their research open – CzechELib-Taylor & Francis Transformative Agreement (2021-2022)

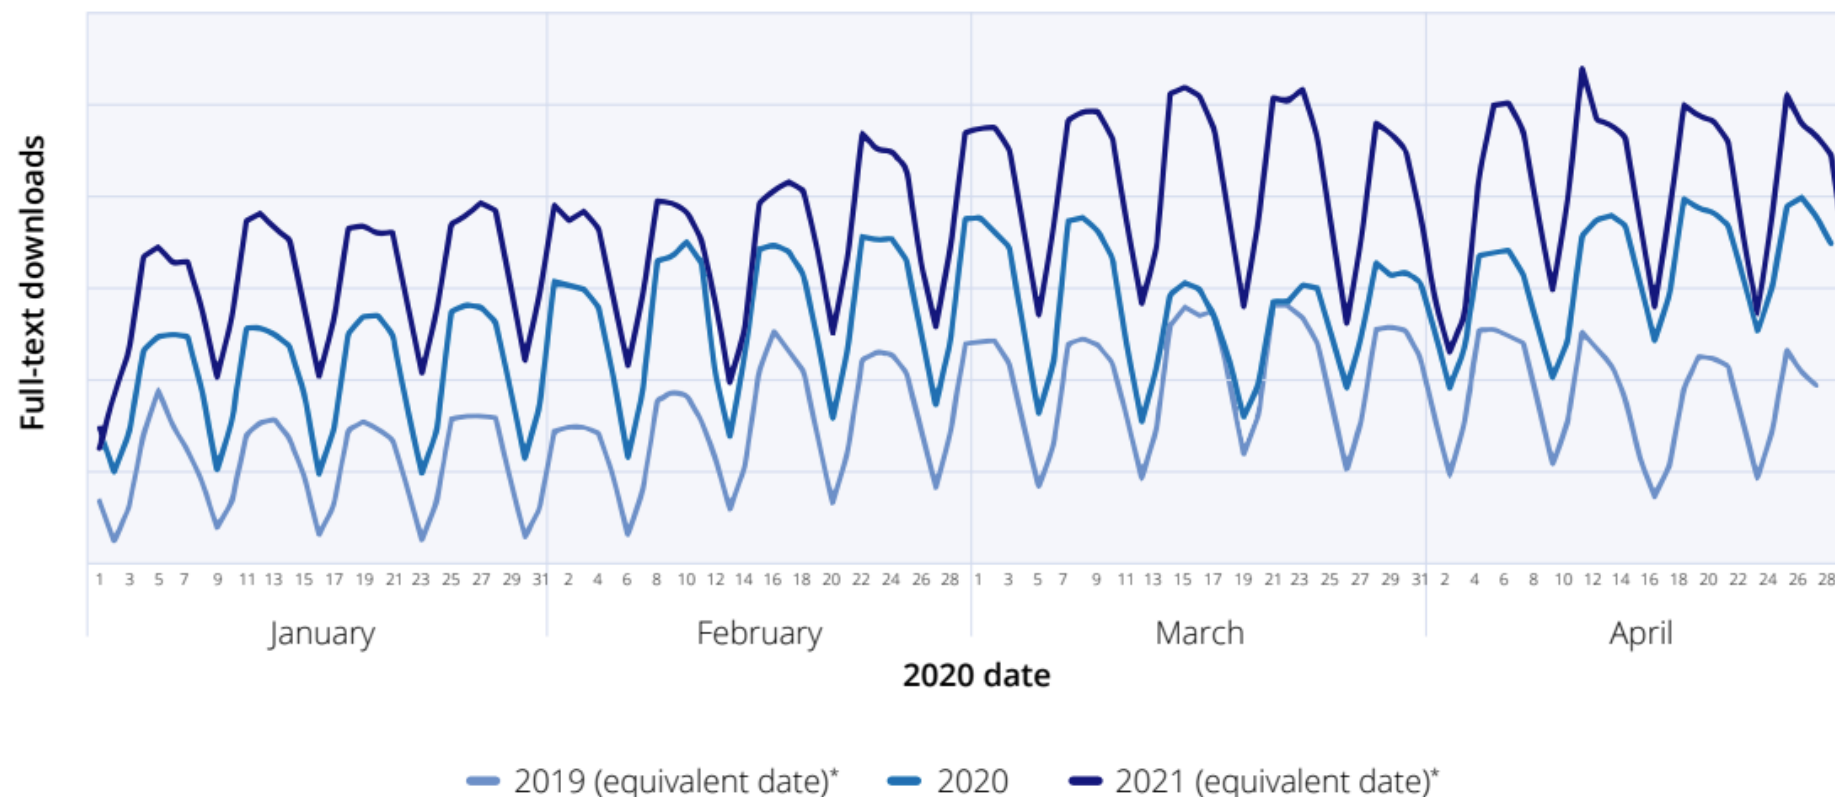

- 35.6% of CzechELib articles accepted in T&F's hybrid portfolio in 2021 were OA under the agreement, compared with 1.5% in 2020
- 100% of these articles had their APCs funded under the transformative agreement
- Downloads to CzechELib hybrid articles published with T&F dramatically increased in the first year of the agreement– articles accepted in 2018 received 32.2K downloads in that year, while articles accepted in 2021 received 81.4K downloads in their year of acceptance, a growth of >150%

Map showing the top downloading countries for CzechELib hybrid articles with T&F in 2021 – Czechia and the US are top in green, with China, Germany, the UK and India following. Orange and yellow showing significant figures – countries in red have also had downloads recorded, showing the truly global reach of this research

Impact of the Covid-19 pandemic
